

Felix A Torrenegra Gamarra

SENIOR RUBY ON RAILS ENGINEER

Profile

Technology **professional** with an **Engineering Degree** focused on **Computer Engineering** from Universidad del Norte with several years of experience in professional environments.

I'm a **Senior Ruby On Rails engineer** who loves to **share knowledge** with co-workers. Always willing to **give you** the best advice and **receive** constructive **feedback**.

Employment History

Senior Ruby on Rails Engineer, Lone Wolf, Remote

JANUARY 2023 — PRESENT

As a Senior Ruby on Rails engineer at Lone Wolf, I work on multiple microservices, collaborating with cross-functional teams to deliver high-quality software solutions. My responsibilities include designing, developing, and maintaining these services, leveraging my expertise in Ruby, Ruby on Rails, Jenkins, Salesforce, Sinatra, Elixir, PostgreSQL, Heroku, and other cutting-edge technologies.

I actively participate in code reviews, providing constructive feedback to peers and mentoring junior developers to promote knowledge sharing and team growth.

Achievements: Since joining Lone Wolf, I have made significant contributions to the development of critical microservices, ensuring their scalability, reliability, and overall performance. I successfully implemented integrations with external systems, including Salesforce, streamlining data synchronization processes and enhancing the user experience.

Technologies used: **Ruby, Ruby on Rails, Jenkins, Salesforce, Sinatra, Elixir, PostgreSQL, Heroku**

Software Engineer , BairesDev, Remote, Medellin - Colombia

OCTOBER 2021 — OCTOBER 2022

As a contractor of a life insurance company, I work as a **Full-stack** software **engineer** receiving **requirements** from **PO** and **planning** its execution with the **PM** and taking care of the **development**. We made several **integrations** with **external services** and made several **optimizations** making changes from operational management up to systemic topics.

I received a no-production application, and now this application is working as expected and sold its first policies. And we're expecting sell more policies with our several integrations with new providers.

Technologies used: **RoR, VueJS, Vue3, Tailwind CSS, Capybara, Rspec, Jtest, Sidekiq, Redis, Active-admin, Storybook**
